Profile

Front-end Developer with 1 year of experience in HTML, CSS, JavaScript and React, successfully completed over 30 mini projects and 5 months of internship at MCI HUB and Pelle Innovation and Tech House.

You can explore all of my projects on [my personal website](#). I am genuinely excited about bringing my motivation and teamwork skills to a company.

Experience

- **MCI HUB, Shahid Beheshti University** - *Front-end junior Developer*

May 2023 - Present

- I've learned the ropes of team collaboration and the vibrant startup culture, all while mastering popular React libraries and platforms.

Skills : Next.js, React.js, Typescript, Tailwind Css, Git.

- **Pelle Innovation & Tech House, Fatemi - Tehran** - *Front-end junior Developer*

Jun 2023 - Present

- Collaborating with the design team to implement visually appealing user interfaces that improve the overall beauty of the website and user interaction.

Skills : React.js , Wordpress, Elementor.

- **Parvaresh Dadeha, Motahari - Tehran** - *Front-end intern*

April 2023 - May 2023

- I've engaged with Angular as well, creating small projects to further develop my proficiency, while also working on data using SQL and the Power BI application.

Skills: Angular.js , SQL.

Licenses & Certifications

- Advanced React - Meta company [show credential](#)

Education

Islamic Azad University Tehran North Branch - Software engineering , bachelor .

2015 - 2020

- Graduation Project: Explored 'Edge Computing for the Internet of Things' under the guidance of Mr. Jabe Dari.

Projects

A selection of React projects:

1. <https://online-english-school.netlify.app>

❖ **TypeScript - ReactRouter - Tailwind - GitHub - Netlify**

- I'm currently working on my project, diving into TypeScript for the first time. I've incorporated React Router for navigation, along with Tailwind CSS and iconsax-react. The project is live on Netlify.

2. <https://setting-password.netlify.app>

❖ **AntDesign - ReactRouter -Tailwind**

- I really enjoyed working on a project that combined functionality and design. I used JSX to create it, incorporated Ant design, for password input and utilized React Router to handle tabs. The site offers both dark and light themes and is deployed on Netlify.

3. <https://landing-page-via-react.netlify.app> (Responsive)

❖ **Tailwind - NPM package**

- Getting started with Tailwind CSS was a little confusing, at first. I found a YouTube tutorial that cleared things up. In addition, I incorporated npm packages into the webpage introducing animations to elevate the user experience.

4. <https://expenses-manager-react.netlify.app>

❖ **JSX**

- This project has provided me with insights into the relationships between parent and child components in React. It has shown me how React's features can be advantageous, in handling larger scale projects.

5. <https://linkedin-analysing.netlify.app> (Responsive)

❖ **JSX - Figma**

- For the first time, I got into crafting a static website through Figma. I found it to be a really effective way for developers and UX/UI designers to team up and work together.

6. [MCI HUB](#)

❖ **Wordpress project that I worked on with the UI-UX team for MCI HUB platform.**
